

# 2008 REMY

REMODEL OF THE YEAR

BEFORE

## KITCHEN REMODEL

### \$30,000 - \$60,000

Our client wanted more room, functionality and storage than the small existing kitchen offered. Walls were moved, windows eliminated, and doors relocated. To better accommodate our taller than average client, all base cabinets were built 38 inches high instead of the standard 36. Raised panel, cream colored, glazed finished, solid wood cabinets with black handles and black granite counter tops make for a true classical look. The new lighting design, including can lights, a classy hanging fixture, and under-cabinet lights gives a radiance that masterfully highlights all the features that make this a truly unique kitchen.
